

Field Effect MDR for MSPs

Now, more than ever, SMBs are turning to MSPs for their cybersecurity needs. MSPs are ready and willing to accept this challenge but it's not without its complications. Ever-changing threat landscapes, complicated and siloed technology, a shortage of expertise and varying client needs all make comprehensive cybersecurity difficult to deliver.

Field Effect MDR makes it easy for MSPs to deliver premium cybersecurity by addressing these challenges head on. It is purpose-built and priced for your entire client base with a multi-tier approach, without the complexity of traditional solutions. Combining enterprise-grade technology, with proven processes and an expert-led 24/7 SOC (security operations center), Field Effect MDR detects and responds to the most sophisticated threats - across the entire threat surface - on your behalf while empowering you to understand and address your clients' risk, to make them harder to attack.

Cybersecurity that helps your MSP business grow

Streamlining cybersecurity for all your clients into a single platform, Field Effect MDR helps you deliver a holistic defense, while achieving exceptional business outcomes.

Reduce Liability - Reduce the likelihood of attack with proactive risk management - improving your clients' security and reducing your own risk as an MSP.

Increase Margins - Consolidate 15+ tools and services in a single solution that is priced for you and your clientele while maximizing your resources and reducing labor costs.

Access Expertise - Extend your team with a 24/7 SOC that will disrupt and contain threats on your behalf and provide a level of world-class expertise.

Accelerate Growth - Stand out in the market with comprehensive cybersecurity and accelerate your business with dedicated enablement support through Field Effect's Partner Program.

The power of holistic technology

Field Effect MDR was natively built to prevent, detect, and respond to threats across your clients' entire environment with a combination of sophisticated technology, processes, and best in class combination of AI and human intelligence. The result? Holistic and noise-free protection that is continuously evolved to detect the latest known (and unknown) threats in the world. So, you can rest assured - your clients are secure.

Key Benefits:

- ✓ Stop threats 24/7 with a robust threat detection and response backed by a team of experts
- ✓ Understand and manage risk
- ✓ Eliminate SKU nightmares
- ✓ Empower L1 techs To address cybersecurity threats
- ✓ Integrate with Autotask, ConnectWise, HaloPSA, and ServiceNow
- ✓ Grow your MSP with a true partnership

"The relationship with Field Effect has been perfect for allowing us to not only become more successful, but to align everything we need for delivering first-class service to our customers."

- Simon Cutler, Chief Operations Officer at CapitalTek

Eliminate complexity and maximize your resources

Field Effects eliminates technical barriers to achieving comprehensive cybersecurity with our proprietary AROs (Actions, Recommendations, and Observations). Field Effect responds on your behalf to neutralize threats at any time of day. Meanwhile, you can empower your techs from L1 to L3 to confidently understand and remediate the threats affecting your clients.

1. Identify the most critical threats across your entire client base with prioritized AROs.
2. Access a jargon-free summary of all security-relevant information within a single ARO.
3. Streamline remediation with step-by-step instructions.
4. Validate that the alert is successfully resolved to ensure peace of mind.
5. Access world-class cyber analysts help with a single click.

PSA integrations

Receive efficient and actionable alerting, triage and resource security issues, and resolve alerts without ever leaving your PSA tool.
